

# iUNFI v1.12.1 What's New

April 1<sup>st</sup>, 2025

## iUNFI v1.12.1

### Highlights:

- Offline Ordering (Emergency Ordering)
- Updates to edit user info when submitting Feedback via iUNFI
- Updated item description for shelf tags printed from belt/mobile printer.
- Various bug fixes

## Enhancement: Offline (Emergency) Ordering

Offline ordering is provided as an option to quickly create an order when no network/wi-fi is available due to an emergency situation (inclement weather, fire, earthquake, etc.)

The details on how to use this feature can be found here →.

<https://iunfi.com/support>

Note: This feature should ONLY be used when absolutely necessary. If you experience iUNFI presenting this option when no emergency exists, please contact your Retail Tech Consultant or send feedback in the iUNFI feedback feature (when back online).

Do not use this feature until you are familiar with it – visit <https://iunfi.com/support> for training details regarding this feature.

# Enhancement: iUNFI Feedback

Will allow the user to validate and/or input their information, making it easier to contact them for follow up.

Things to note:

Updating or modifying your information here will not update your profile.

iUNFI feedback is always appreciated but should be related to the iUNFI application only. Issues with orders, deliveries, claims/credits should not be submitted via iUNFI feedback as they are not able to be addressed at this time. Please follow existing processes for these types of issues.

## Feedback Update

The screenshot shows a mobile application interface for providing feedback. At the top, the status bar indicates 'iPod', signal strength, and the time '11:41 AM'. The app header is green with the text 'Submit feedback' and a close icon. Below the header, a message reads 'We value your input!'. The form contains several input fields: 'Name' (filled with 'Feedback User'), 'Contact me via' (with radio buttons for 'Phone' and 'Email', where 'Phone' is selected), 'Phone Number' (filled with '(952) 888-0000'), and 'Account Number' (filled with '12345'). A thank you message follows: 'Thank you for sharing your feedback with us. Your comments will be shared promptly with our team.' Below this is a text area for 'Tell us about your experience'. At the bottom of the form are two buttons: 'Cancel' and 'Send'. The bottom of the screen features a navigation bar with icons for 'Orders' (with a badge '13'), 'Tasks', 'History', 'Lists', and 'More'.

## Enhancement: Temporary tags – Item descriptions

Previously, enhanced item information was printing for item description on temporary tag printed by iUNFI. This resulted in multiple brands being printed on the tag and useful item description info being cut off when the tag printed.

A new source was identified for item descriptions and is now being utilized when printing tags.

The enhanced description is still provided in iUNFI. It can be viewed in item details by tapping on an item in an order, the catalog, a task, or order history.
